FOREWORD

Statistical records of the New York State dairy industry have been published, in various forms, since 1892. From 1892 to 1917, tables of dairy statistics were published in annual reports of the Dairy Commission and of the Department of Agriculture and in separate bulletins prepared at irregular intervals. From 1918 to 1972, printed bulletins were regularly published entitled "Statistics Relative to the Dairy Industry in New York State". From 1973 until 1978 the bulletins were published under the title "New York Dairy Statistics". Beginning with the 1979 annual bulletin, the title has been modified slightly to "New York State Dairy Statistics".

The 2002 Annual Summary follows the organizational format that was implemented in 1979. The report is divided into nine sections beginning with "General Dairy Statistics" which presents an overview of some of the major characteristics of the dairy industry in New York State. The remaining eight sections deal in more detail with specific areas including receipts of milk and dairy products, payments to dairy farmers, fluid milk sales and manufactured dairy products.

Effective January 1, 2000 Federal Milk Marketing Orders in the United States were consolidated. This and other changes modified the way that most dairy farmers were paid for their milk. As a result of these changes, several tables in this bulletin have been reformatted.

A great deal of the data presented in this bulletin is obtained from the monthly reports filed by milk handlers and processors operating in New York State. These reports furnish an accounting of dairy receipts and utilization of milk and milk products together with related information, particularly payments and prices received by farmers. Frozen desserts statistics are compiled by the New York Agricultural Statistics Service and market order statistics are obtained from reports published by the various orders.

The cooperation of the many individuals, milk dealers, cooperative associations and public agencies, who have provided data and other assistance in the preparation of this publication, is gratefully acknowledged.
