
FARM FIRE SAFETY

Fire is the leading cause of catastrophic loss in the United States.

Put safety first! Create a plan to prevent fires and to protect yourself and your animals:

- Invite the local fire dept. to tour your farm each year, and review your safety plan with them.
- Have several fire extinguishers and flashlights located around the farm, and check regularly to be sure they're working.
- Train your staff to use the fire extinguishers.
- Post emergency contact information in multiple areas.
- Plan evacuation routes and rally points for people and animals, and let your staff know.
- Make sure your equipment for animal evacuation is available and working.
- Flip this card to track your safety plan.

Farm name:

Emergency contact:

Secondary contact:

Yearly checklist			
Fire department tour & safety plan review			
Fire extinguishers full, working, & exp. date			
Workers trained to use fire extinguishers			
Evacuation route identified & reviewed			
Evacuation equipment checked			
Rally points identified for people & animals			
Electrical equipment inspected			
Wiring inspected			
Stored chemicals reviewed & inventoried
