

New York State Dairy Statistics

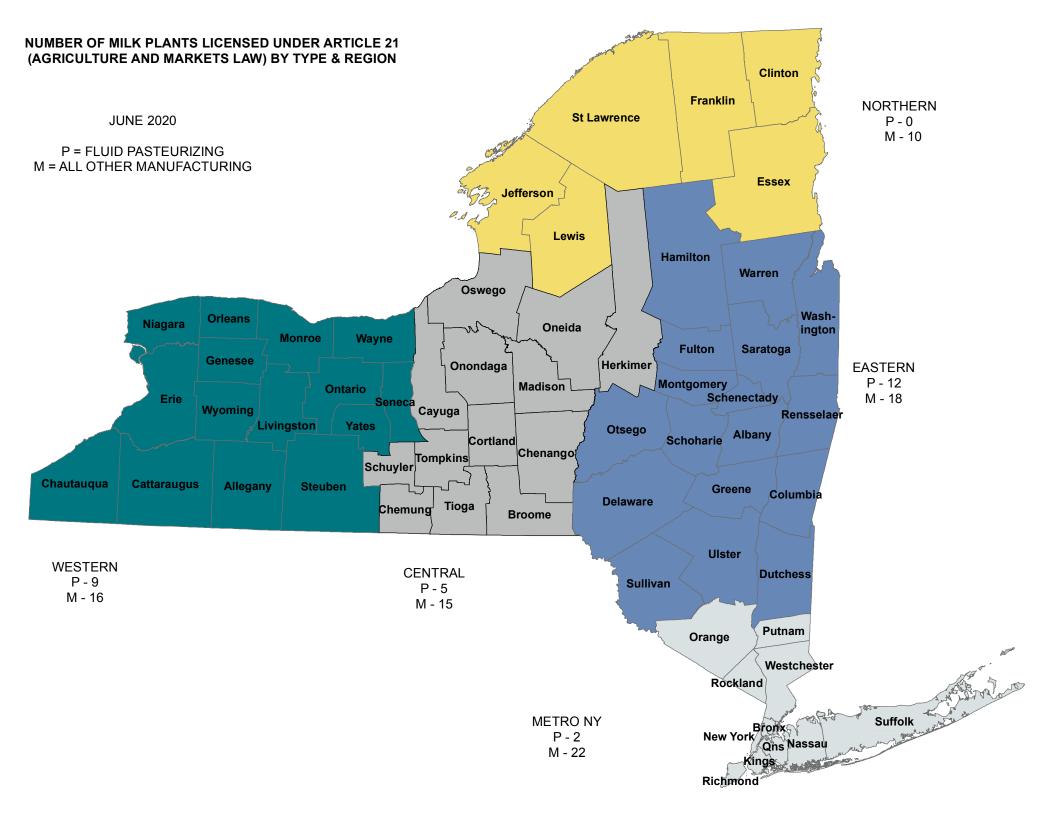

2020

Annual Summary

Richard A. Ball

Commissioner

Division of Milk Control and Dairy Services

2020 NEW YORK STATE DAIRY STATISTICS REPORT

NEW YORK STATE DEPARTMENT OF AGRICULTURE AND MARKETS

Compiled and issued by the Division of Milk Control and Dairy Services

Jennifer Trodden, Deputy Commissioner Casey McCue, Director

Prepared by research and information staff:

Louis Canter, Program Manager, Dairy Services David DelCogliano, Program Research Specialist III

Foreword

New York State has nearly 3,600 dairy farms that produce over 15 billion pounds of milk annually, making New York the nation's fourth largest dairy state. The dairy industry is the State's largest agricultural sector, contributing significantly to the State's economy by generating nearly half of the State's total agricultural receipts, and providing some of the highest economic multipliers in the State.

The 2020 New York State Dairy Statistics Annual Summary provides an overview of the dairy industry. The report is divided into seven sections beginning with General Dairy Statistics. The remaining six sections outline in more detail specific areas, including receipts of milk and dairy products, payments to dairy farmers, fluid milk sales and manufactured dairy products.

Several statistics related to the New York State dairy industry are notable in this report. Once again, New York State processors made more than one billion pounds of all cheeses, including cottage cheese. In 2020, the State's processors made more than 144 million pounds of American cheese, the highest amount ever produced (<u>Table 28</u>). They also produced 294 million pounds of cream cheese, ranking number one in the United States in 2020. The State's processors were also the national leaders in the production of creamed and low-fat cottage cheeses (192 million pounds) (<u>Table 28</u>).

In 2020, the number of dairy cows in the state remained the same at 625,000, annual production per cow increased by 1.6% to 24,500 pounds and the total amount of milk produced in the state increased by 1.4% resulting in a total of 15.337 billion pounds produced.

Also in 2020, production of yogurt, condensed whole milk, non-fat dry milk and dry whey increased by 4.3%, 343%, 1%, and 7.4% respectively.

Fluid milk sales at New York State plants totaled 2.9 billion pounds. This was a small increase from 2019 (<u>Table 9</u>); however, packaged whole milk, lowfat milk, skim milk, and half and half produced by New York State plants, and sold in New York State decreased from 2019 (<u>Table 21</u>). Total sales of packaged fluid milk from New York State milk plants and out-of-state dealers in New York State were almost 2.75 billion pounds (<u>Table 23</u>).

The data presented in this bulletin is primarily obtained from the monthly reports filed by milk handlers and processors operating with an Article 21 license in New York State. These reports provide an accounting of dairy receipts and utilization of milk and milk products as well as related information, such as payments and prices received by farmers. Market order statistics are obtained from reports published by the various orders (Federal Market Orders 1 and 33 and New York State Western Milk Marketing Order).

The cooperation of the many individuals, milk dealers, cooperative associations and public agencies that provided data and other assistance in the preparation of this publication is greatly appreciated.

An electronic version of this publication is available on the Department's website at http://www.agriculture.ny.gov
