

How to Report

Any individual may report a disease outbreak or suspicious disease occurrence in animal(s) by calling the Division of Animal Industry at **518-457-3502**. Individuals may contact the Department of Health directly about rabies suspects. The Division of Animal Industry will contact the Department of Health on your behalf for any other condition that is reportable to the Department of Health. The department may receive notifications about conditions listed under “monthly notifications” either by monthly laboratory reports or through individual reporting.

What to Report

In general terms, disease occurrence should be reported either if the disease is identified as one of the specific **Reportable Diseases** listed below or if any of the following apply:

- The disease presents as a new set of symptoms not previously recognized in the species of animal affected.
- The same disease symptoms appear to be affecting animals in multiple locations.
- A disease with a recognized seasonal or species distribution occurs in an unusual season or species.
- High Morbidity (number affected/unit of time).
- High Mortality (number dying/unit of time).
- Central Nervous System disorders.
- Vesicular disease in ruminants or horses.
- Hemorrhagic disease.

Ag & Markets Law, Article 5, §73 requires the reporting of any infectious or communicable animal disease to the department by any person. In practical terms, not every disease or disease occurrence is of equal importance and the reporting of every occurrence of every disease would overwhelm surveillance for those diseases of greater importance because of their potential impact on animal health, public health or the economic viability of the agricultural industry in the state and the nation.

Poultry

IMMEDIATE NOTIFICATION—As soon as confirmed or suspected

Avian Chlamydiosis (<i>Chlamydia psittaci</i>)*	Exotic Newcastle Disease*
Avian Infectious Bronchitis (Arkansas strain)	Pullorum (<i>Salmonella pullorum</i>)
Avian Infectious Laryngotracheitis	Salmonella enteritidis*
Avian Influenza—Highly Pathogenic (H5 or H7)*	Toxicosis (feed)
Avian Influenza—Low Pathogenic (H5 or H7)	Tularemia*
Duck Viral Enteritis	
Duck Viral Hepatitis	* = reportable to Dept of Health

MONTHLY NOTIFICATION

- Avian Mycoplasmosis (*Mycoplasma gallisepticum*)
- Avian Tuberculosis (*Mycoplasma avium*)
- Fowl Cholera (*Pasteurella multocida*)

How to Report

Any individual may report a disease outbreak or suspicious disease occurrence in animals by calling the Division of Animal Industry at **518-457-3502**.

Bovine

IMMEDIATE NOTIFICATION—As soon as confirmed or suspected

Akabane	Louping Ill
Anaplasmosis	Lumpy Skin Disease
Anthrax*	Malignant Catarrhal Fever (Sheep Associated)
Aujeszky's Disease (Pseudorabies)	Malignant Catarrhal Fever (Wildebeest Associated)
Bluetongue—Domestic Serotypes	New and Old World Screwworm
Bluetongue— Exotic Serotypes	Q Fever*
Bovine Babesiosis	Rabies*
Bovine Brucellosis*	Rift Valley Fever*
Bovine Ephemeral Fever	Rinderpest
Bovine Spongiform Encephalopathy*	Salmonella spp. (<i>dublin</i> , <i>typhimurium</i> , any MDR strain)
Bovine Tuberculosis*	Schmallenberg Virus
Contagious Bovine Pleuropneumonia	Sweating Sickness
Cysticercosis	Theileriosis
Echinococcosis / Hydatidosis*	Toxicosis (feed)
Epizootic Hemorrhagic Disease	Trichomoniasis (Group B arbovirus)
Foot and Mouth Disease	Trypanosomosis (<i>T.congolense</i> , <i>vivax</i> , <i>brucei brucei</i>)
Heartwater	Vesicular Stomatitis Virus (Domestic: NJ, IN)
Hemorrhagic Septicemia	Vesicular Stomatitis Virus (Foreign: IN, Piry)*
Ibaraki	Wesselbron Disease
Infectious Petechial Fever	Tularemia*

MONTHLY NOTIFICATION

- Bovine Cysticercosis*
- Bovine Genital Campylobacteriosis
- Dermatophilosis
- Enzootic Bovine Leukosis

* = reportable to Dept of Health

How to Report

Any individual may report a disease outbreak or suspicious disease occurrence in animals by calling the Division of Animal Industry at **518-457-3502**.

Caprine—Ovine

IMMEDIATE NOTIFICATION—As soon as confirmed or suspected

Anthrax*	Peste de Petits Ruminants (Goat Plague)
Aujeszký's Disease (Pseudorabies)	Q Fever (<i>Coxiella burnetti</i>)*
Bluetongue—Domestic serotypes	Rabies*
Bluetongue—Exotic serotypes	Rift Valley Fever*
Borna Disease	Rinderpest
Brucellosis (excluding <i>B. ovis</i>)	Salmonella spp. (<i>S. abortus ovis</i> , <i>typhimurium</i> , any MDR strain)
Cache Valley Virus	Schmallenberg Virus
Contagious Agalactia of Sheep and Goats	Scrapie
Contagious Caprine Pleuropneumonia	Sheep and Goat Pox
Contagious Ecthyma (Soremouth, Orf)	Theileriosis
Echinococcus / Hydatidosis*	Toxicosis (feed)
Foot and Mouth Disease	Tuberculosis*
Heartwater (<i>Ehrlichia ruminantium</i>)	Vesicular Stomatitis (Domestic: NJ, IN)
Nairobi Sheep Disease	Vesicular Stomatitis (Foreign: IN, Piry)*
New and Old World Screwworm	Wesselbron Disease
Nipah	Tularemia*
Ovine Epididymitis (<i>B. ovis</i>)*	

MONTHLY NOTIFICATION

Caprine Arthritis / Encephalitis	Enzootic Abortion of Ewes (<i>Chlamydomphila abortus</i>)*
Maedi Visna (Chronic Progressive Pneumonia)	* = reportable to Dept of Health

Cervidae

IMMEDIATE NOTIFICATION—As soon as confirmed or suspected

Anthrax*	Epizootic Hemorrhagic Disease
Bluetongue	Foot and Mouth Disease
Botulism* (<i>C. botulinum</i> toxin)	Hemorrhagic Septicemia (<i>Pasteurella multocida multocida</i>)
Brucellosis*	Malignant Catarrhal Fever
<i>Burkholderia pseudomallei</i> *(Meloidosis)	Q Fever* (<i>Coxiella burnetti</i>)
Campylobacteriosis (GI)	Salmonella spp.* (any MDR strains)
Chronic Wasting Disease	Tuberculosis* * = reportable to NY Dept of Health
	Vesicular Stomatitis (Domestic & Foreign*)

How to Report

Any individual may report a disease outbreak or suspicious disease occurrence in animals by calling the Division of Animal Industry at **518-457-3502**.

Companion Animal

IMMEDIATE NOTIFICATION –As soon as confirmed or suspected

- Brucella spp.** (dogs)
- Leishmania (dogs)
- Rabbit Hemorrhagic Disease (rabbits)
- Rabies* (companion animals)
- SARS-CoV-2 (companion animals)
- Screwworm (companion animals)
- Tularemia* * = reportable to Dept of Health

MONTHLY NOTIFICATION

* = reportable to Dept of Health

Equine

IMMEDIATE NOTIFICATION –As soon as confirmed or suspected

- | | |
|---|---|
| African Horse Sickness | Japanese Encephalitis Virus* |
| Anthrax* | New and Old World Screwworm |
| Contagious Equine Metritis (<i>T.equigenitalis</i>) | Rabies* |
| Dourine (<i>T.equiperidum</i>) | Rift Valley Fever* |
| Eastern Equine Encephalomyelitis* | Strangles (<i>S.equi subspecies equi</i>) |
| Epizootic Lymphangitis (Equine Blastomycosis) | Surra (<i>T.evansi</i>) |
| Equine Infectious Anemia | Toxicosis (feed) |
| Equine Piroplasmiasis (<i>T.equi</i> or <i>B.caballi</i>) | Trichinellosis (<i>T.spiralis</i>)* |
| Equine Rhinopneumonitis (EHV-1, EHV-4, EHM) | Venezuelan Equine Encephalitis* |
| Equine Viral Arteritis | Vesicular Stomatitis Virus (Domestic: NJ, IN and Foreign: IN, Piry) |
| Glanders (<i>Burkholderia mallei</i>)* | Western Equine Encephalomyelitis* |
| Hendra | West Nile Virus* |
| Horse Pox | Tularemia* |

MONTHLY NOTIFICATION

- | | |
|--|---|
| Leptospirosis* * = reportable to Dept of Health | Ulcerative Lymphangitis (<i>C.pseudotuberculosis</i>) |
|--|---|

How to Report

Any individual may report a disease outbreak or suspicious disease occurrence in animals by calling the Division of Animal Industry at **518-457-3502**.

Porcine

IMMEDIATE NOTIFICATION—As soon as confirmed or suspected

African Swine Fever	Echinococcus / Hydatidosis*
Anthrax*	Paramyxovirus (Menangle Virus)
Atrophic Rhinitis	Porcine Morbillivirus (Nipah)*
Aujeszky’s Disease (Pseudorabies)	PRRS
Brucellosis (<i>B.suis</i>)*	Rabies*
Classical Swine Fever	Salmonella spp. (<i>cholerasuis</i> , <i>typhimurium</i> , any MDR strain)
Enterovirus Encephalomyelitis (Teschen Disease)	Swine Tuberculosis (<i>M.avium</i> et al)
Foot and Mouth Disease	Toxicosis (feed)
New and Old World Screwworm	Trichinellosis (<i>T. spiralis</i>)*
Swine Vesicular Disease	Vesicular Stomatitis (Domestic: NJ, IN)
Vesicular Exanthema of Swine	Vesicular Stomatitis (Foreign: IN, Piry)*
Tularemia*	

Porcine

MONTHLY NOTIFICATION

Erysipelas	Porcine Cysticercosis*
Porcine Babesiosis	* = reportable to Dept of Health
